Heavy Duty WRC Fin 68x16

Surface treatment

- All aluminium profiles natural anodized VB6/A20/VOM1. Average thickness 20 µm.
- All visible aluminium parts and profiles will be coated with a polyester powder in a standard RAL colour. Thickness avg. 60 µm; gloss 70%.
- All visible aluminium parts and profiles will be sublimated with a standard film, top, bottom rail and rail brackets will be coated with a polyester powder in a standard RAL colour. Thickness avg. 60 µm; gloss 70%.
- Western Red Cedar fins not treated
- Wood fins are treated with a nano coat protection layer and finished with a water based stain

M (1 : 5) Standard center to center Fin Type

Note: Because wood is a natural product, it cannot be excluded to have colour differences within one batch. Natural weathering effects like some decolourisation or slight deformation are to be considered material characteristic and are therefore excluded from warranty.
